# SIGMA

LOCAL AREA NETWORK (LAN) TRAINER

MODEL - LAN100G

This trainer provides training of hardware and software theory of Local Area Networking of Computers with experiments. This trainer is based on syllabus of MCSE - (Microsoft Certified Software Engineer)

LAN Cable

SPECIFICATIONS

LAN Hardware

1.	10 Mbps Ethernet Card	:	3 Nos.
2.	Coaxial Cables	:	1 Mtrs x 2 Nos .
3.	T- Connector	:	3 Nos
4.	UTP Cables with connectors	:	5 Mtrs x1 Nos + 3 Mtrs x2 Nos.
5.	10/100 Mbps 8 Port Hub	:	1 No. (On Board)

EXPERIMENTS

1. To install & test various network connector, cables
2. To install network file server
3. To install network print server
4. To demonstrate the use of Internet
5. To Study of router, repeater & bridge
6. To install web browser
7. To set up new connection or network
8. To create home group and set/change sharing options

In keeping view of SIGMA policy of continuous development and improvement, the Specifications may be changed without prior notice or obligation.
