

VERTICAL OSCILLATOR & OUTPUT SECTION FOR COLOUR T.V.

MODEL CV100

These boards are designed to provide experimental and theoretical knowledge of Vertical oscillator & Output section.

FEATURES

- 1. Study of the general circuit of the Section.
- 2. Tracing of the circuit and identification of different components.
- 3. Understanding the alignment and adjustment procedure.
- 4. Measurement of test point voltages.
- 5. Observation of test point Waveforms.
- 6. A detailed manual containing different practical on these boards is provided along with the boards.
- 7. A pattern generator having IF Output, Composite Video Output, V. Sync Output, H. Sync Output, S-IF Output is required for experimenting on this section e.g. Color pattern generator. Also RF sweep generator is required.

SPECIFICATIONS

- 1. IC used TDA 1670A.
- 2. Power supply requirement 25V/2A
- 3. Vertical Linearity, Height and frequency control.
- 4. Thermal protection.

In keeping view of SIGMA policy of continuous development and improvement, the Specifications may be changed without prior notice or obligation.
