## **LABORATORY EXPERIENCES**

1. Draw line using different line style
2. Draw the circle using Brezenham algorithm
3. Perform the operation of scaling for two dimension picture
4. Perform the operation of translation for two dimensional picture
5. Perform the operation of transformation for 3D picture
6. Perform the operation of windowing and clipping technique
7. Perform the operation of animation using segment technique
8. Perform the experiment to draw the polygon.
9. Draw the polygon using filling technique.
10. Draw the curve using B-spline algorithm.
11. Simple animations using built in functions in C.
