

SINGLE STAGE RC COUPLED TRANSISTOR CE AMPLIFIER

MODEL AMP07A

This board has been designed with a view to provide practical and experimental knowledge of single stage R-C coupled amplifier on SINGLE PCB.

SPECIFICATIONS

1. IC Regulated power supply internally connected PNP transistor
2. Main on/off switch, Fuse and Jewel light.
3. The unit is operative on 230V, $\pm 10\%$ at 50Hz AC Mains.
4. Unit has transparent glass cover so that the Internal circuit may be visible to the operator
5. Adequate no. of patch cords stack able from rear both ends.
6. Good Quality. reliable terminal/sockets must be provided at appropriate places on panel for connections/observation of waveforms.
7. Strongly supported by detailed Operating Instructions. giving details of Object. Theory Design procedures. Report Suggestions and Book References.

In keeping view of SIGMA policy of continuous development and improvement, the Specifications may be changed without prior notice or obligation.
